TLV worldwide

Through its strong presence on 5 continents, TRATO-TLV group has become the European leader in lighting and hospital equipment. The company built its success on the response tailored to the needs of its customers and its adaptation to international norms and standards. The group currently generates 30% of its revenue internationally in over 55 countries.

TLV Healthcare

MADE IN FRANCE

Who are we?

TLV is a French designer and manufacturer of lighting units and equipment for hospitals. The company sales all over the world products for :

- Normal care rooms
- OT/ICU Resuscitation

With 250 employees (TRATO-TLV group) and a modern production facility, TLV is a leading international supplier to private and public healthcare institutions.

Design and Innovation

TLV has been building lighting and hospital equipment solutions providing quality, comfort, safety, and good value to healthcare professionals all over the world for more than 70 years.

Today, TLV offers the most complete range on the market, using the most advanced technologies. Many of its models are equipped with LEDs, contributing to sustainable development through their long working life and high light output.

TLV's R&D department lies at the heart of its operations. It uses the finest and most efficient materials to build ergonomic, high-performance hospital equipment and lighting units.

TLV has a dedicated styling unit within its design office, enabling it to develop devices with added aesthetic and ergonomic value.

Quality

TLV is involved in a continual improvement process via its quality management system which is based mainly on the following standards:

- ISO 13485: Quality management system requirements for medical devices.
- Regulation 2017/745/UE about medical devices

BED HEAD UNITS (P.10 - P.55)

• FLUIDYS - P.14

• AXIS - P.22

FLUIDYS

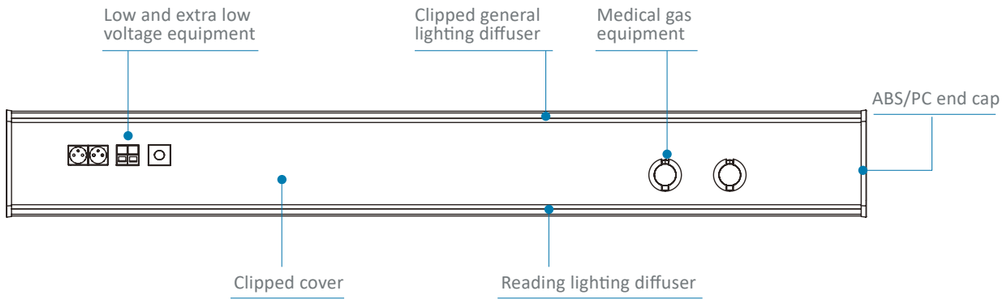

Continuous lighting The FLUIDYS offers the possibility of a continuous direct light, adding an aesthetic appreciation.

Design and ergonomics The bed head unit can integrate an optional 300 mm long (minimum length) medical accessory mounting rail. This rail can be positioned at the top or bottom of the bed head unit.

Medical gas casing These easy-clean medical gas casings provide protection. They are securely fastened to the cover, for easy installation and maintenance.

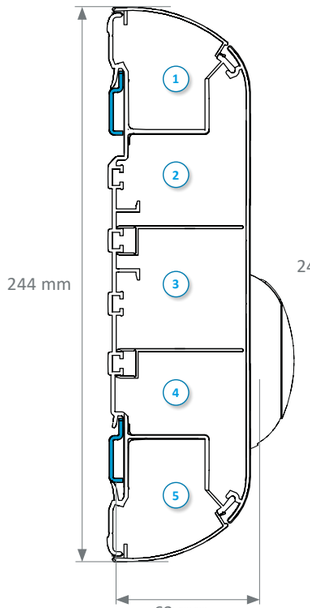

TECHNICAL FEATURES

SECURED FLUIDYS

The Fluidys bed head unit has a specific cover secured by key for medical gas. Made of PMMA (Polymethyl methacrylate), the transparent cover is resistant and can be adapted to environments requiring a maximum security. It has a high impact resistance rating IK 07.

Front view

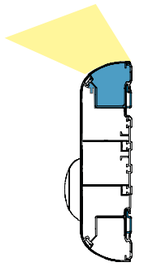

TECHNICAL FEATURES

Its optical design allows perfect control of the lighting, favouring the well-being of care teams and patients.

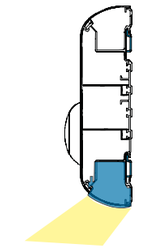

General lighting

- Extruded polycarbonate diffuser
- MIRO 20 SILVER® aluminum reflector

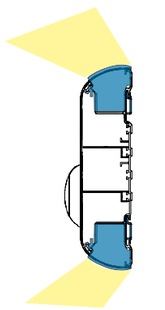

Reading lighting

- Extruded polycarbonate diffuser
- MIRO 20 SILVER® aluminum reflector

Caring lighting

Caring lighting is a combination of direct (reading) lighting with indirect (general) lighting.

Lighting power

Lighting	Modules power	Types of sources	Color temperature	Luminous Flux (1)	Consumption	System Efficiency	Driver(s)
General lighting	35,9 W (4 Ft)	LED	3000 K 4000 K	5965 lm	42,2 W	141,4 lm/W	Fixed / DALI
	44,3 W (5 Ft)	LED	3000 K 4000 K	7390 lm	51,1 W	143,6 lm/W	Fixed / DALI
General lighting (Dynamic lighting)	47,2 W (4 Ft)	LED	2700 K to 6500 K	6200 lm	54 W	114,8 lm/W	DALI
Reading lighting	12,5 W (2Ft)	LED	3000 K 4000 K	2035 lm	14,9 W	136,6 lm/W	Fixed / DALI
Night light	1 x 3,1 W	LED	3000 K	292 lm	3,3 W	89,8 lm/W	Fixed

- Luminous flux maintenance factor : L80B10 to 60 000 hours
- MacAdam Ellipse: 3 SDCM
- LED sources photobiological risk : GP1

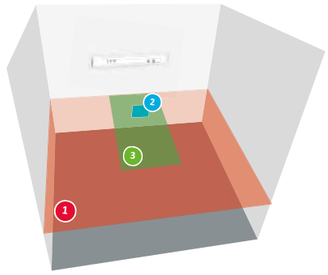

(1) All the luminous flux indicated in the brochure are based on the flux of the LED modules also known as system flux.

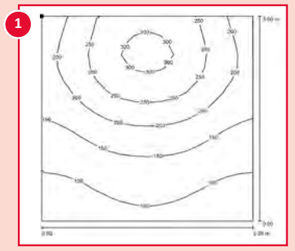

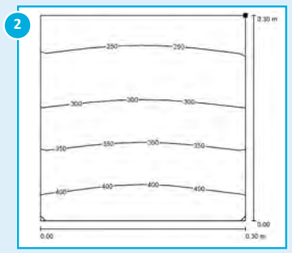

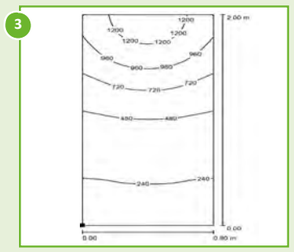

Luminaire output flux = (Module flux) x (optical efficiency), the optical efficiency of the luminaire is indicated in the Eulumdat file (LDT line 23) available for download on our website or on request.

EFFICIENT LIGHTING

Lighting study

- Standard room
- Dimensions of the room: 3 m x 3 m, ceiling clearance 2.5 m
- Reflection coefficients: ceiling 7, walls 5, and floor 3
- Coefficient of depreciation 0.83

	General lighting Virtual general lighting plane of a surface equal to the one of the room, located 0.85 m above the floor (3 m x 3 m for a single room).	Reading lighting Virtual reading plane 0.3 m x 0.3 m inclined at 75° located 1.1 m from the floor and 1 m from the wall where the unit is located.	Caring lighting Virtual examination plane 2 m x 0.9 m located 0.85 m from the floor, centred in width and 0.1 m from the wall.

Consumption	42,2 W	14,9 W	57,1 W
Average lighting	150 lx	312 lx	535 lx

Dynamic Lighting

The FLUIDYS bed head unit is available with dynamic lighting.

For more information please see page 304.

Continuous lighting The AXIS bed head unit offers the possibility of a continuous direct light, adding an aesthetic appreciation.

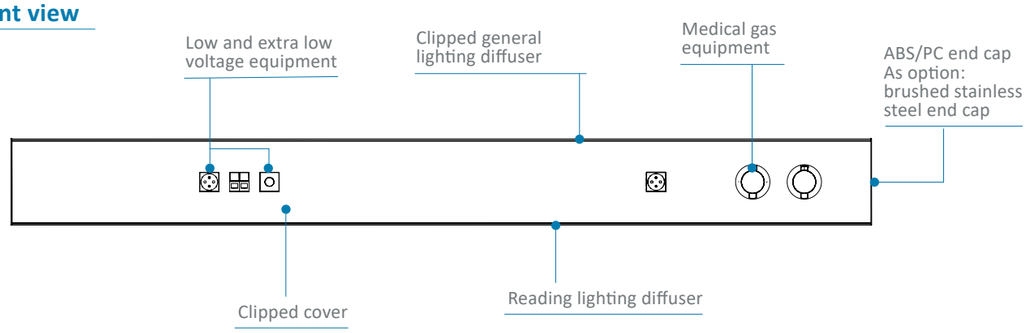

Design and ergonomics The bed head unit can integrate an optional vertical stainless steel tube support and a shelf which would be positionned at the bottom of the bed head unit.

Personnalisation The cover of the AXIS bed head unit is fully customizable in the color of your choice: plain, wood or decorative film. It fits easily with the decoration of the room.

AXIS

OPTIONAL ACCESSORIES

TLV has developed a range of optional equipment for the AXIS bed head unit to meet the needs of healthcare staff.

Brushed stainless steel end cap

The ABS/PC end caps can be replaced by brushed stainless steel end caps to provide cohesion with all the biomedical accessories.

Stainless steel vertical tube support for accessories

Stainless steel tube Ø30 mm: max load 25 kg.
Dimensions: (HxW) 1180 mm x 150 mm.

Stainless steel tablet support for accessories

Brushed stainless steel tablet support for accessories : max load 5 kg.
Dimensions (HxWxD) 331 mm x 207 mm x 200 mm.

FEW OTHER CONFIGURATIONS:
COMBINATION OF ONE OR MORE WOOD PANELS AND / OR ACRYLIC PANELS WITH AN AXIS BED HEAD UNIT

Acrylic panel with inclusion of broken glass (or other decorations)

AXIS bed head unit

AXIS bed head unit

Acrylic panel with inclusion of broken glass (or other decorations)

Matching wood panel with the tint of the laminate cover of the bed head unit

Acrylic panel with inclusion of broken glass (or other decorations)

FLEX-E LIGHT reading spotlamp

AXIS bed head unit

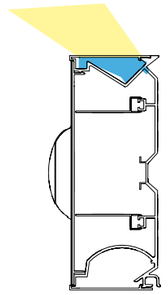

Matching wood panel with the tint of the laminate cover of the bed head unit

CONTROLLED LIGHTING

The AXIS optics have been studied to enable a perfect control of lighting. The aim is to contribute to improve the well being of the healthcare teams and the patient.

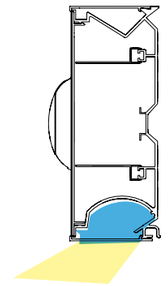

General lighting

- Diffuser made of satin co-extruded polycarbonate

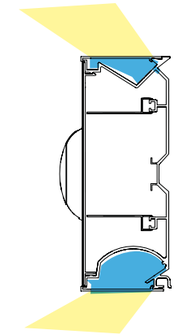

Reading lighting

- Diffuser made of satin co-extruded polycarbonate

Caring lighting

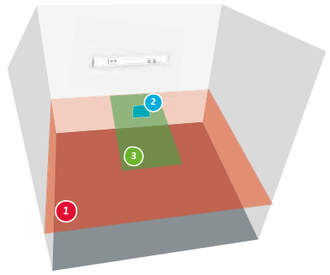

Caring lighting combines direct (reading) lighting with indirect (general) lighting.

HI-BEAM

Design and Ergonomics The HI-BEAM bed head unit features an innovative aesthetic design. Its curved shape is unique in the market.

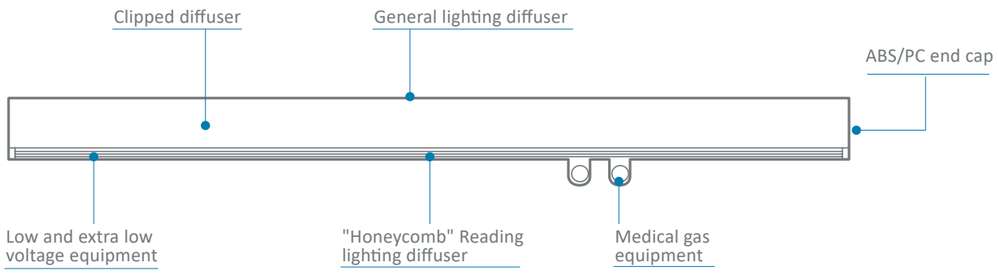

LED sources of HI-BEAM bed head unit provide excellent energy performance.

Medical gas casing Gas casing are available with or without cap. They are perfectly integrated into the design of the bed head unit, with easy access for the care team.

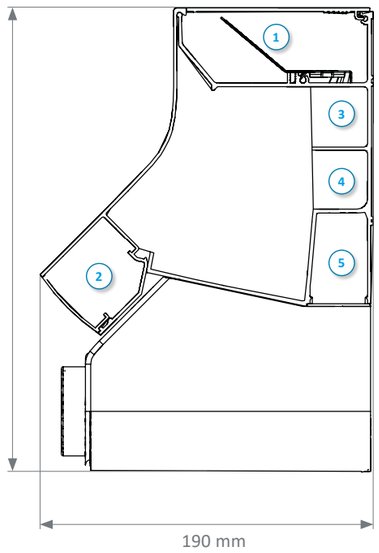

TECHNICAL FEATURES

The HI-BEAM is a customizable product offering an innovative, ultra-modern design. With its unique shape, it blends perfectly into normal care rooms.

FLUIDYS HALF WALL COLUMN FOR AMBULATORY USE

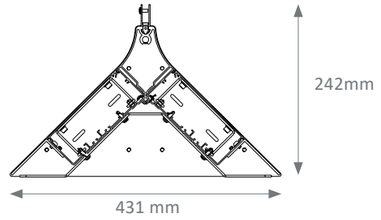

TECHNICAL FEATURES

The ambulatory concept is manufactured with FLUIDYS suspended profiles to which wooden panels are attached. The custom-made design of the panels, in 10 mm HPL, ensures optimum stability. They can be cut to the size and shape of your choice*.
It is suspended from the ceiling and the partitions stand on feet to ensure optimal asepsis and easy cleaning.

Front view

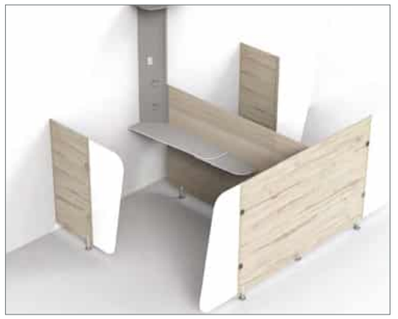

Cross-section

Configuration examples

*Within the limit of the maximum dimension of the panel

Hinged door (optional)

The hinged doors located on the partitions enhance privacy while contributing to the overall design of the space.

Rotating shelf (optional)

The custom-made rotating shelf allows you to arrange a tray for snack and/or the patient's personal effects.

FLEX-E LIGHT (optional)

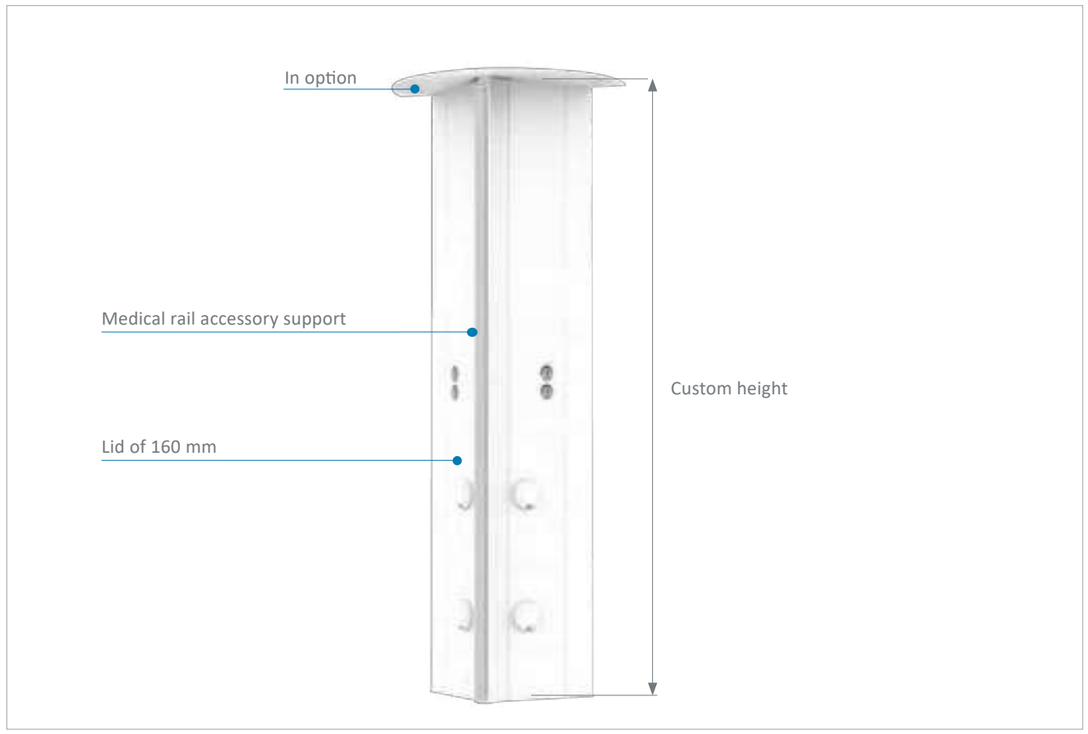

A spot makes it possible to discreetly integrate reading lighting on the bed head unit.

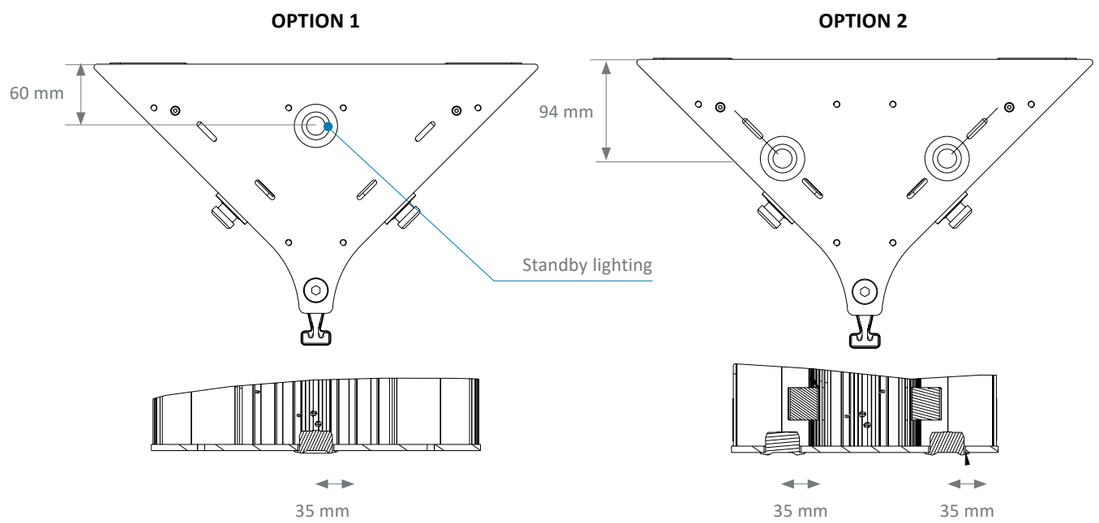

OPTION: FLUIDYS HALF-WALL COLUMN

The FLUIDYS column for technical trays has 2 faces. It can be fitted with or without an accessory rail, depending on requirements.

Goodwood
Hanlvoet

B

Custom design GOODWOOD MOVE's panels are fully personalisable (colours, material, decorative film) to match the decor of any room. In addition, the sliding panel can be installed on the right or on left side of the patient according to the need, or both sides for a maternity room for example.

Hidden equipment Medical gas outlets and low and extra low voltage equipments are hidden behind a sliding panel to give a hotel aesthetic to the product.

Custom lighting Depending on the needs, the GOODWOOD MOVE concept offers different LED lighting solutions: indirect lighting tray and reading spot FLEX-E LIGHT, GOODLIGHT or LYSA wall lighting units.

GOODWOOD MOVE

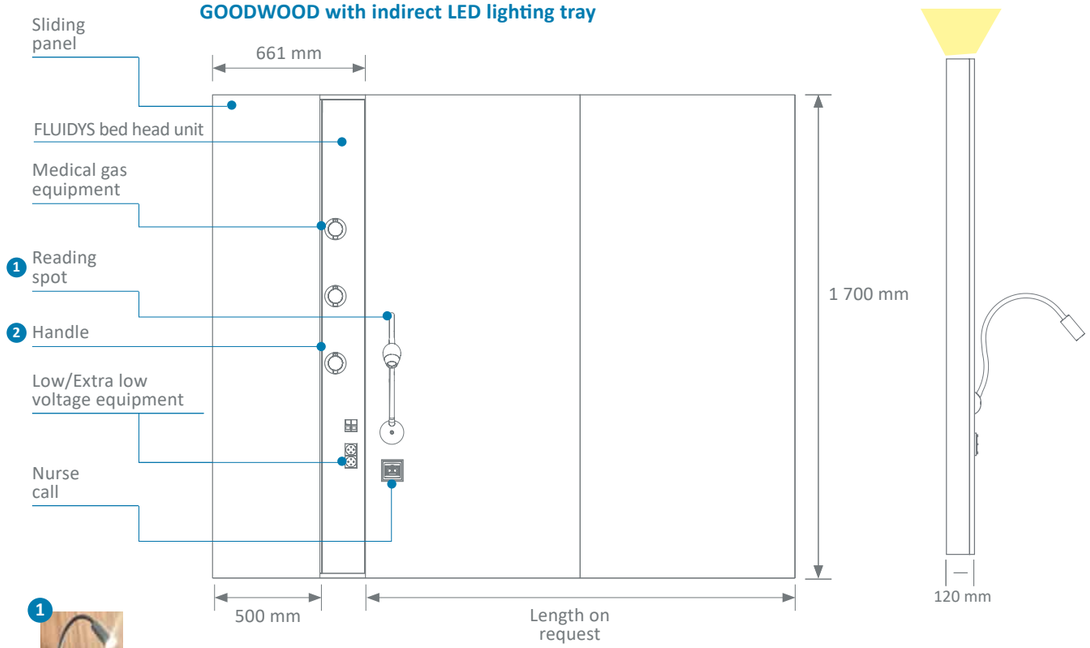

GOODWOOD MOVE architectural concept hides electrical equipment and medical gas outlets behind a sliding panel. It brings a hotel atmosphere to the hospital room and contributes to the overall aesthetic of the room.

Lighting

Combined with a wall-mounted lighting unit from the TLV range (LINA, LYSA, LUMIA or GOODLIGHT), the concept MADEIRA provides a comfortable, efficient lighting solution to contribute to the well-being of patients and healthcare professionals.

It can optionally be equipped with the following:

A FLEX-E LIGHT reading spotlamp on flexible.
For more information, see page 142.

LED night light built into the bottom fitting.

Optionnal Equipment

The MADEIRA concept is also available in **custom made configuration**. It can incorporate extra low/low voltage devices and medical gas on the front panel or on the sides. If necessary, the side profiles can be equipped with a rail (on the right and/or left-hand side), where biomedical accessories can be fixed.

It can include your choice of technical devices, for example :

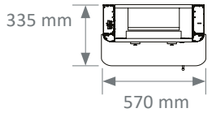

Haemodialysis water purifier

Example of MADEIRA custom-made configurations

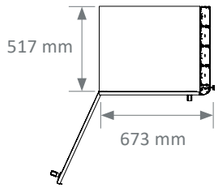

With a bedside table and cabinet in the lower part.

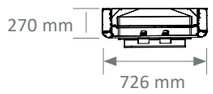

With a cupboard at the top and a wardrobe equipped with safe.

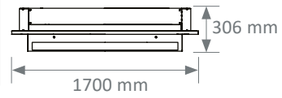

With a haemodialysis water purifier.

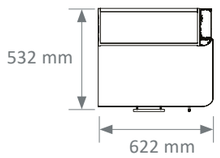

With a wall lighting unit

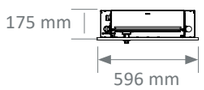

With upper recesses and a bedside table in the lower part, where a fridge can be integrated.

With wood panels covering the electrical distribution profiles.

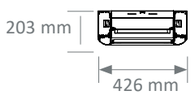

With steel front panel.

With flush mounted wood panels between the electrical distribution profiles.

SUSPENDED **COLUMNS**

MULTICARE EVOLUTION p.184

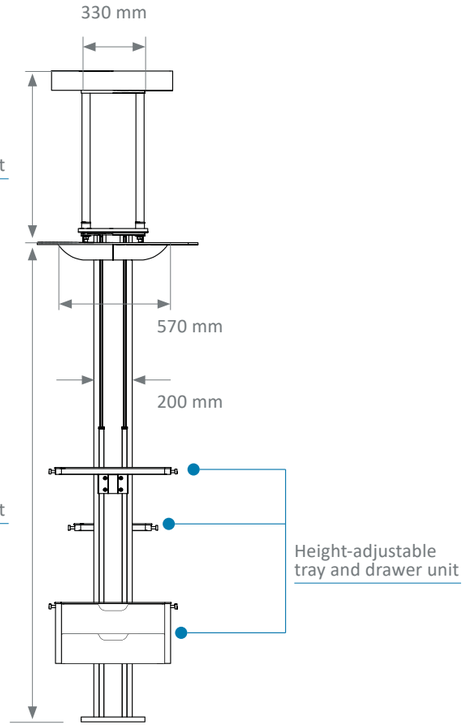

FLUIDYS CONCEPT FOR AMBULATORY USE p.192

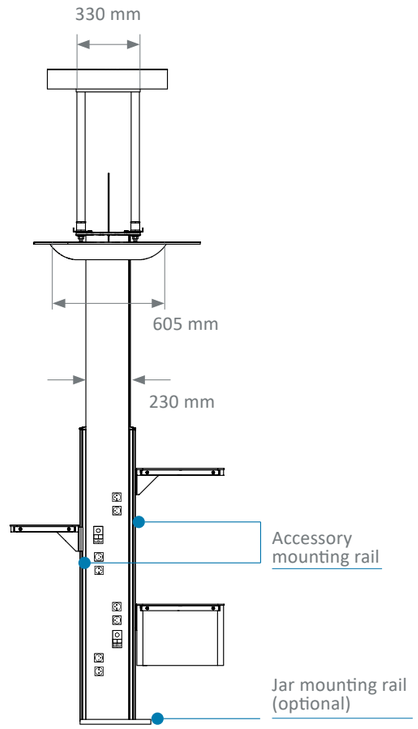

MULTICARE EVOLUTION

The MULTICARE EVOLUTION column is ideal for the distribution of medical gases and extra low/low voltage supplies in recovery rooms, intensive care units, resuscitation units, or other OT/ICU Resuscitation departments.
Its ergonomics makes it adaptable to the treatment area and optimizes access to the patient and the care team's work area.

Front view

Side view

Colors

	White RAL 9016
MULTICARE EVOLUTION	●

The MULTICARE EVOLUTION column is ideal for the distribution of medical gases and extra low/low voltage supplies in recovery rooms, intensive care units, resuscitation units, or other OT/ICU Resuscitation departments.
Its ergonomics makes it adaptable to the treatment area and optimizes access to the patient and the care team's work area. It can support a payload of 200 kg

Rails

Several pieces of biomedical equipment can be hung thanks to the accessories mounting rails, located on the front and back.

The column can incorporate an optional jar support, located at the bottom.

Drawers

See Accessories available on page **n°300**

Extra tube system to hold accessories

This device clamps onto the vertical service head and makes it possible to hang main biomedical accessories.

LIGHTING

The MULTICARE EVOLUTION column can incorporate the following optional equipment:

- Examination lighting mounted on an articulated arm, with maximum travel 1857 mm

- LED night light at the bottom (1.2 W)

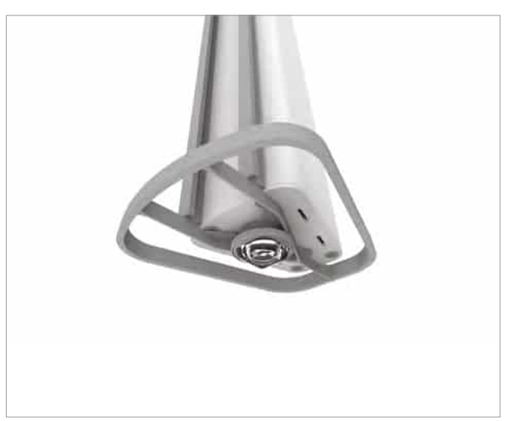

- Treatment or minor surgery lighting mounted on an articulated arm, with maximum travel 1330 mm

- A FLEX-E LIGHT spot reading light (grey)

- 360° Column Low Circulation Light DALI

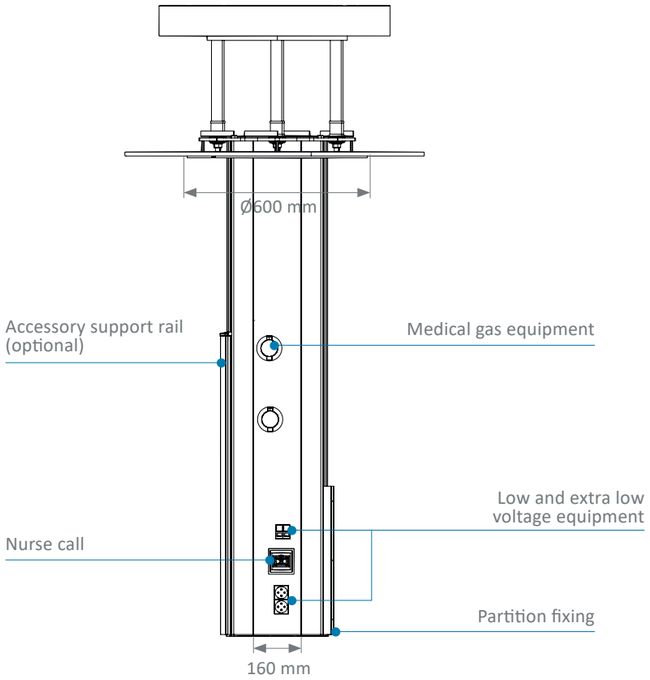

The ambulatory concept is manufactured with FLUIDYS suspended profiles to which wooden panels are attached. These custom partitions enable the patient to be isolated from activity and from other people. It preserves comfort and privacy.

FLUIDYS CONCEPT FOR AMBULATORY USE

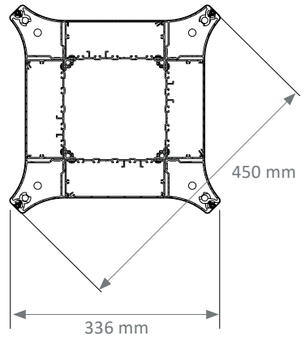

TECHNICAL FEATURES

The custom-made design of the panels, in 10 mm HPL, ensures optimum stability. They can be cut to the size and shape of your choice *. Only one supply point is necessary for 4 treatment stations.
It is suspended from the ceiling and the partitions stand on feet to ensure optimal asepsis and easy cleaning.

Front view

Cross-section

Example configuration

*Within the limit of the maximum dimension of the panel

For TLV's laminate panel colors, see page 302

ACCESSORIES

Hinged door (optional)

The hinged doors located on the partitions enhance privacy while contributing to the overall design of the space.

Rotating shelf (optional)

The custom-made rotating shelf allows you to use it as a snack tray and / or to put the patients belongings.

FLEX-E LIGHT (as option)

A spot makes it possible to discreetly integrate reading lighting on the bed head unit.

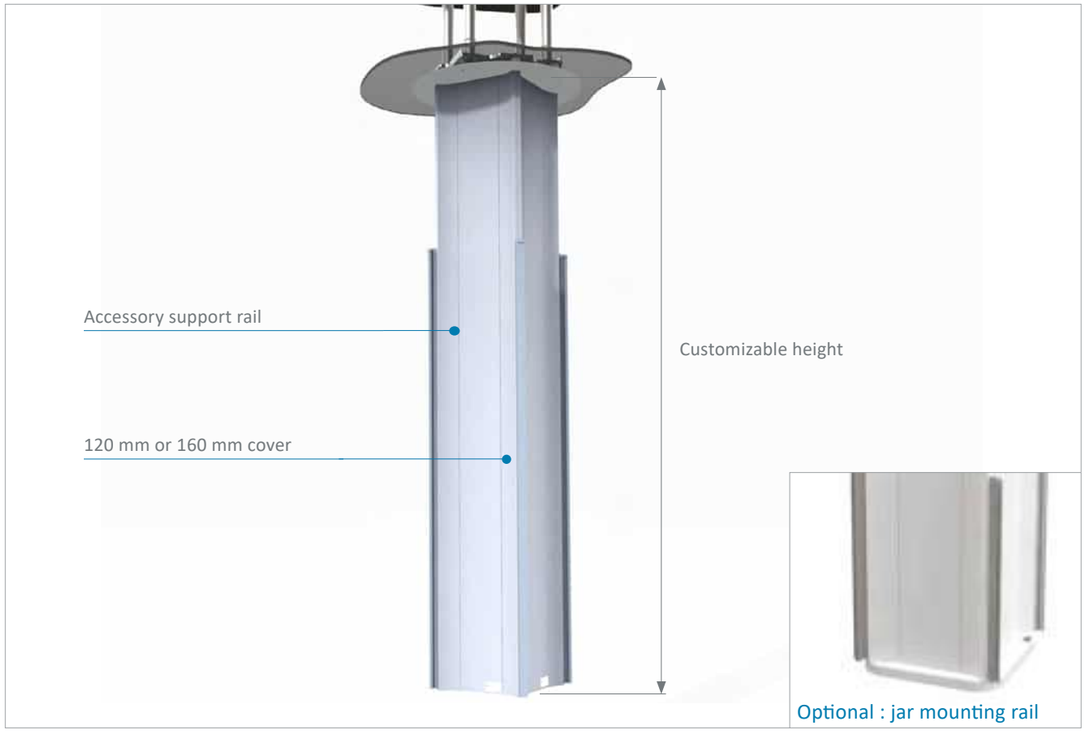

EXAMPLES OF CONFIGURATIONS

SUSPENDED **BEAMS**

HI-CARE p.202
FLUIDYS p.216

The HI-CARE peripheral suspended beam optimizes the quality of surgical procedures by giving surgeons, anesthesiologists, and OR teams easy access to electrical power supplies and medical gases, which can easily be positioned within arm’s reach. Patient access, working conditions, and cleanliness of treatment areas are therefore optimized.

HI-CARE

FUNCTIONALITY

The advantage of the multidisciplinary operating room concept is that it pools most of the human resources in the anesthesia and surgical teams and therefore improves patient rotation and the sequence of programs, while centralizing activities in a single location.

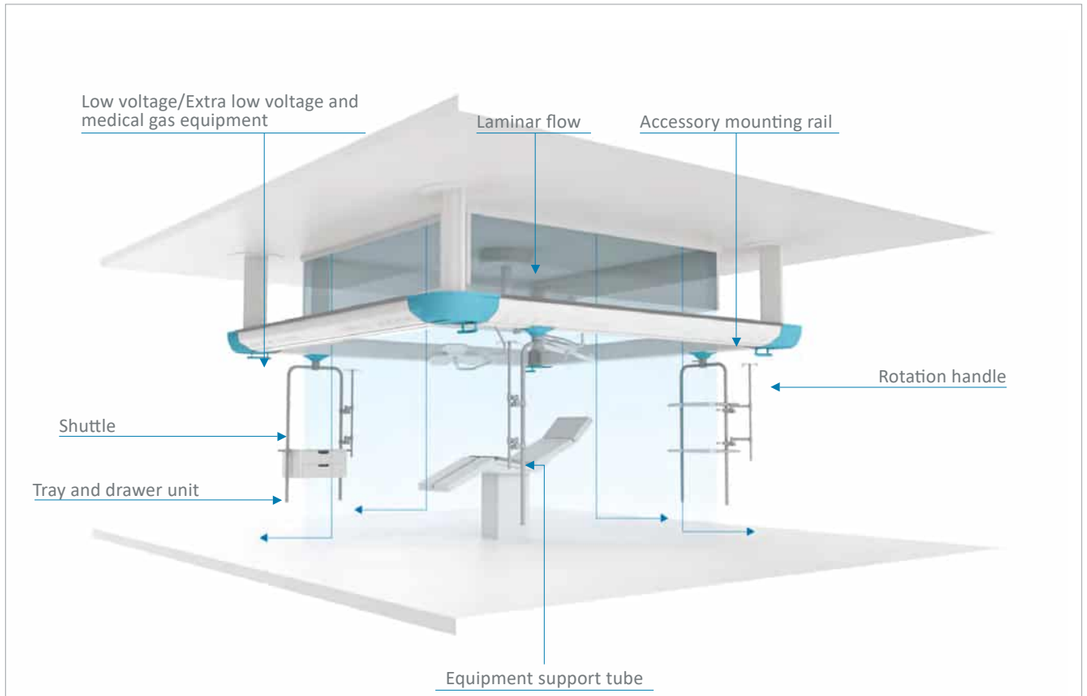

It also has the advantage of allowing shared use of heavy equipment, reducing the need to move it around. It also adapts to most types of table: Fixed, transfer, or mobile, so that their accessories can be shared.

HI-CARE offers significant time savings in terms of OR availability. With its rounded shapes and smooth surfaces and thanks to the flush-mounting of all equipment, it is easy to clean and disinfect after each procedure.

Air flow

HI-CARE is carefully designed to be compatible with all (laminar flow) air filtration ceiling-mounted systems. It contributes to reduce the risk of infection and airborne contamination thanks to the centralisation of equipment in a single unit with a small space requirement.

It also offers the opportunity to protect the air flow in the surgical area from peripheral turbulence by equipping it with additional glass shielding made by the external suppliers of your choice (air processing specialists).

EQUIPMENT

Integration of electrical equipment

Waterjet cutting gives HI-CARE's cover a precise, custom finish. This allows the possibility of integrating sockets and outlets of all different shapes. Electrical devices are flush-mounted, for easy cleaning and disinfection of the product.

Integration of gases

Every type of gas outlet standard (DIN, BS, AFNOR) can be integrated into the beam.

Thanks to these various configurations, the HI-CARE beam provides a modular concept to suit most situations and fulfil the needs of surgical teams.

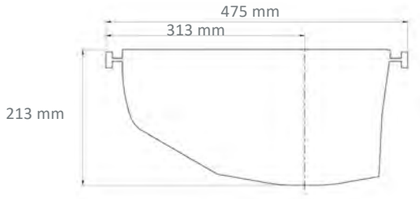

Rails

The HI-CARE beam incorporates a 25 x 10 mm accessory mounting rail on its inner and outer faces all along its periphery.

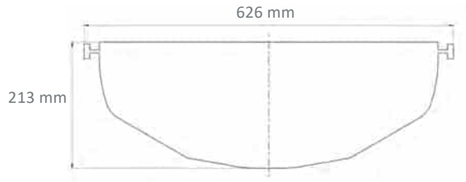

Beam characteristics

Outer face equipped with power sockets and medical gas outlets. Outer and inner rails.

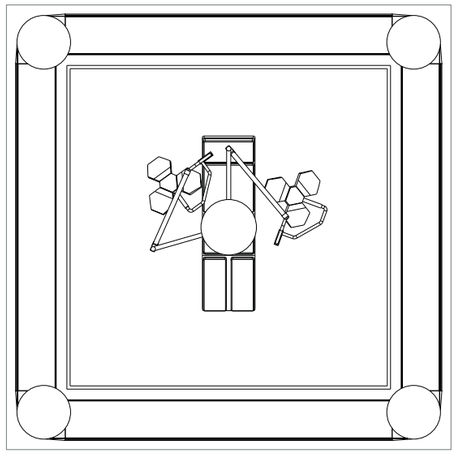

Outer and inner faces equipped with power sockets and medical gas outlets, and outer and inner rails.

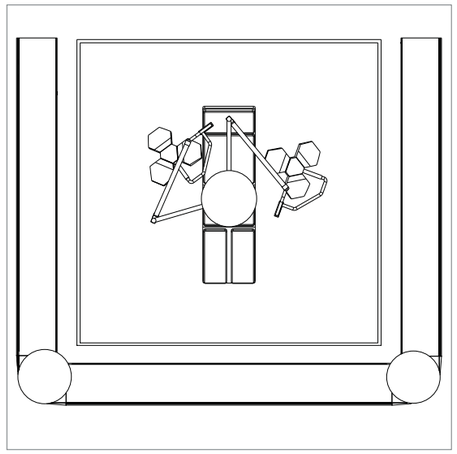

CONFIGURATIONS

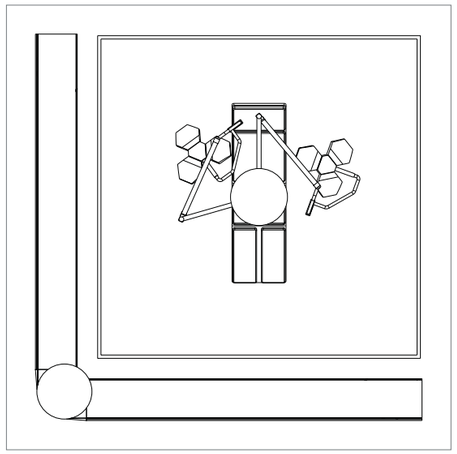

☐ Configuration

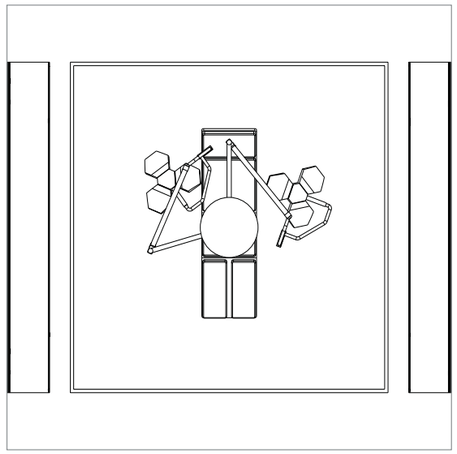

U Configuration

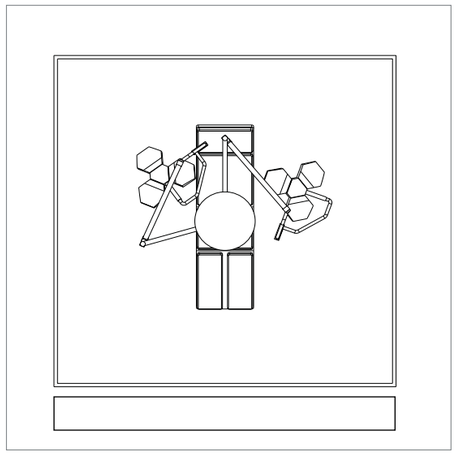

L Configuration

Parallel configuration

Beam configuration

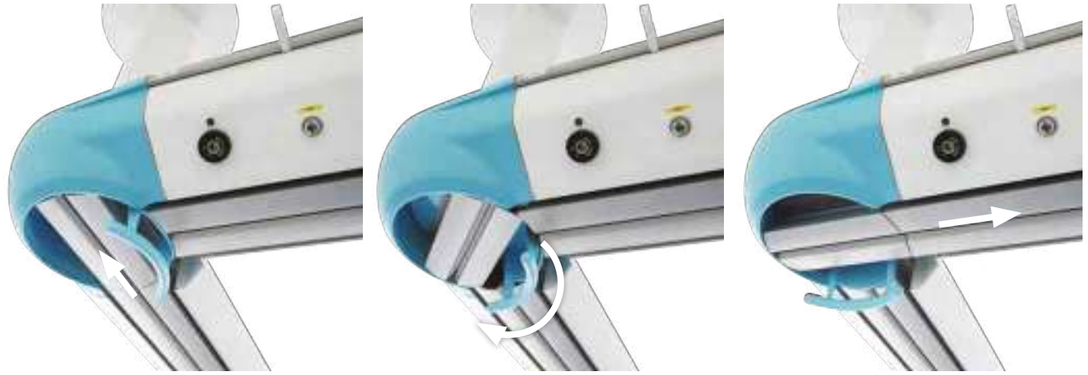

SHUTTLES CONFIGURATION

Shuttles are equipped with a sliding trolley mounted on ball bearings.

With the indexed rotation angles, the position of therapeutic equipment and accessories can be adjusted between procedures, quickly and along the whole periphery of the beam. This provides an optimized work area for anesthesiologists, surgeons, and their teams.

The shuttle translation and rotation locking system, using a joystick, makes it easy and safe to handle the trolleys and the biomedical equipment.

Easy positioning of shuttles

Shuttles are equipped with Ø 38 mm stainless steel tubes. They come in a choice of 800 mm or 1500 mm in height, and their payload is 150 kg.

Vertical equipment support tube

To optimize the work area, this can be equipped with a distribution box mounted on a trolley or arm, according to your requirements.

Its sliding trolley mounted on ball bearings is equipped with a cable and hose control system allowing sliding of 1200 mm and electropneumatic braking of the translation movement.

Technical characteristics of boxes

The distribution box of HI-CARE suspended beam is available with or without offset arm.

Distribution box without offset arm

Distribution box with offset arm

Offset arm characteristics
- 400 mm extension
- Rotation with indexable stop every 25°
- Electropneumatic rotation braking system

Vertical

- Aluminum profile
- Equipped with three accessory mounting rails, 25 x 10 mm (two on the front panel and one on the back)
- Adjustable friction braking of rotation
- Optional LED position lighting located at the bottom
- Loading capacity : 150 kg without offset arm and 120 kg with offset arm
- Three heights for vertical box : 600 mm, 1200 mm or 1500 mm

Horizontal

- RAL 9016 with lacquered steel body
- Equipped with two vertical Ø 38 mm accessory support tubes 800 or 1500 mm long
- Adjustable friction braking of rotation
- Optional : bottom accessory mounting rail
- Loading capacity : 150 kg
- Dimension of the box (L x W x D) : 760 x 324 x 267 mm

Translation system

The distribution box is fed by the suspended beam.

Braking control

Located on the shelf, controls with illuminated button allow easy and ergonomic use of the arm rotation and translation system. They are engraved to allow intuitive operation of the box.

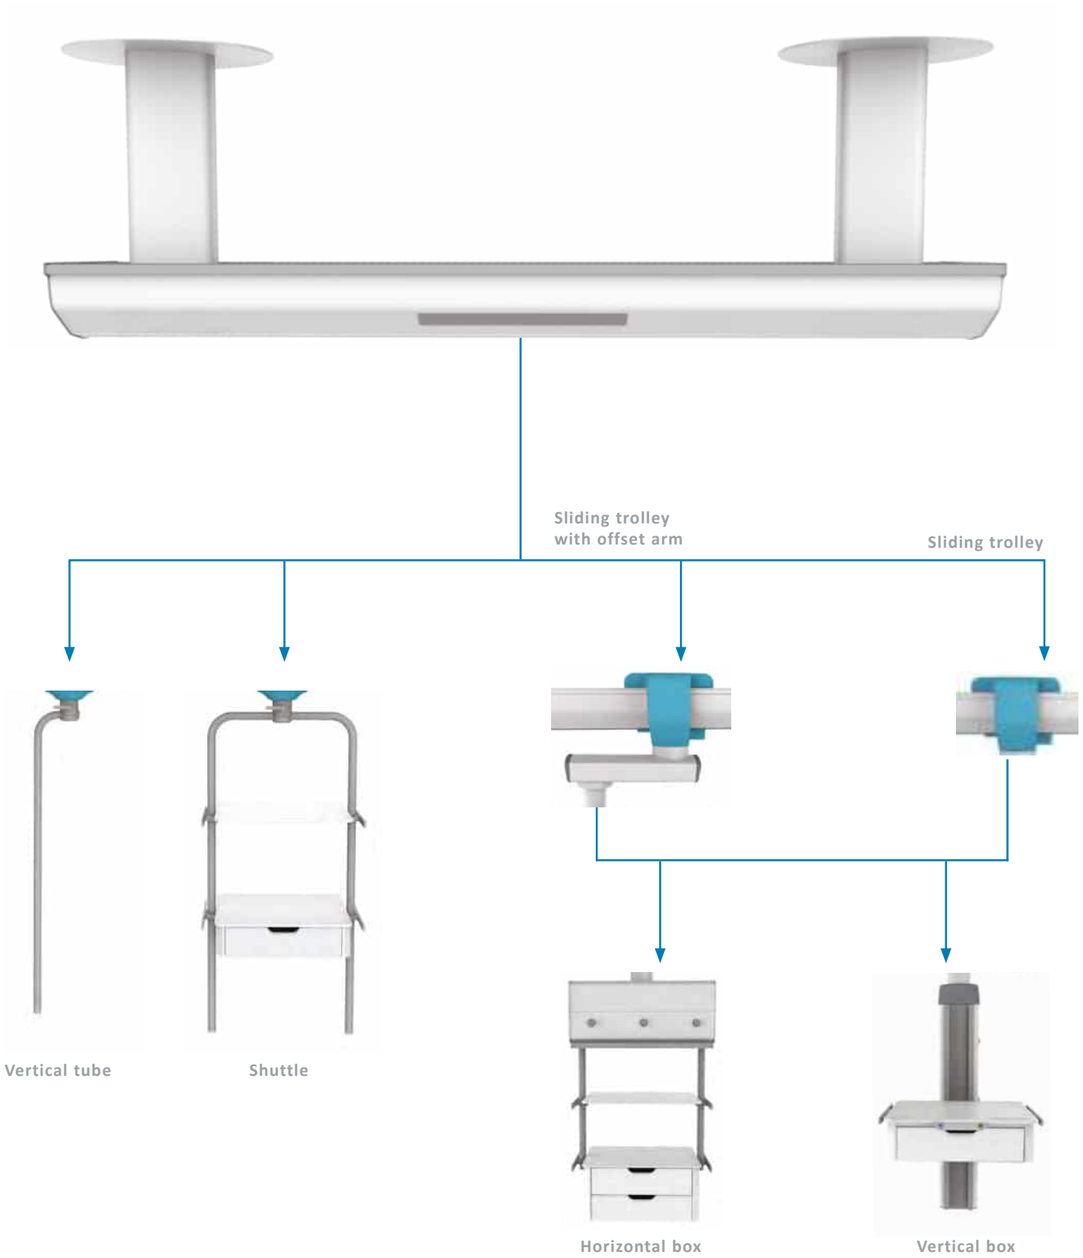

Extra tube system to hold accessories page 283

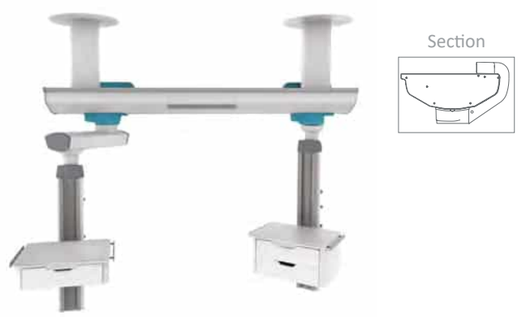

This device clamps onto the vertical service head (1200 and 1500 mm) and makes it possible to hang main biomedical accessories.

- RAL 9016 white lacquered steel body
- Loading capacity : 150 kg
- L x H x P (without rail) : 760 mm x 324 mm x 267 mm
- Equipped with two vertical Ø 38 mm accessory support tubes, 800 or 1500 mm long

Controls with illuminated button

They are located on the front panel of the tray, allowing easy and ergonomic use of the motorized arm braking.

With their color coding, they allow intuitive operation of the arm.

Controls and handles

Control with tray

Offset handle for light loads

Heavy duty handle

Trays & Drawers

The trays are designed to comply with the strictest standards concerning hygiene and durability. Their surface is compact with white core (HPL), and they have lateral accessory mounting rails 25 x 10 mm.

The tray units can accommodate one or two drawers. The ergonomic handles built into the trays make it easy to handle the arm. The drawers are removable for easy cleaning.

Accessory support bracket for double-sided enclosure

This device clamps onto the vertical service head and makes it possible to hang main biomedical accessories.

The TECH-CARE Easylift ceiling-mounted pendant is designed to be ergonomic and user-friendly for care teams. Because it is compact, it easily adapts to any architectural configuration. It supplies low/extra-low voltage and medical gases.

TECH-CARE
EASYLIFT

EQUIPMENT

Integration of electrical equipment

The TECH-CARE cover is cut by water jet, providing a precise, tailor-made finish so that sockets of any shape can be built into it. Electrical devices are flush-mounted, for easy cleaning and disinfection of the product.

Integration of gases

The distribution boxes incorporate all the standard gas outlets (DIN, BS, AFNOR).

Technical characteristics of boxes

- Aluminum profile
- Length: 750 mm
- Equipped with a handle so that care teams can operate it quickly and easily
- Mechanical friction braking of rotation
- Vertical travel of 580 mm
- As option : mounting on an offset arm allowing 500 mm, 750 mm or 1000 mm extension, according to configuration

Lock button

Located close to the handle, the illuminated control button of the electromagnetic system enables to hold the arm in the bottom or top position.

BIOMEDICAL
EQUIPEMENT

Medical gases monnitoring
Biomedical accessories

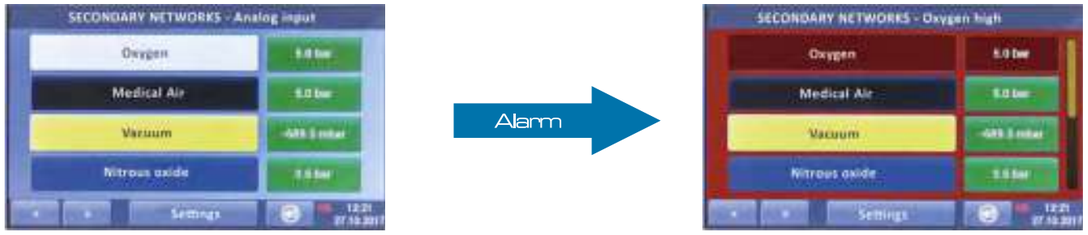

SECURIDYS

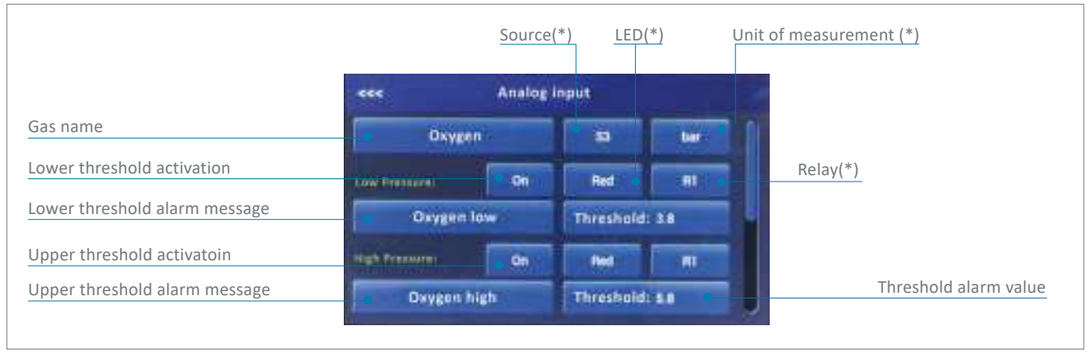

SECURIDYS medical gas monitoring are dedicated to centralized or decentralized monitoring (production, care units, bottles, etc.) of the distribution of medical gases. They are equipped with modbus RTU or Modbus TCP/IP. They have a 5-inch touch screen and a USB port. The SECURIDYS offers an optional recessed box. Every SECURIDYS have 8 analog inputs and 16 logic inputs.

Signalling & Alarms

SECURIDYS 816 (8 analog inputs and 16 logic inputs) units have been awarded the CE Marking. They can be configured according to your needs, to monitor medical compressed gas distribution and vacuum systems in accordance with the standards and regulations in force. The analog and logic channels on eight different networks (sources, tanks, compressors...) can all be monitored by the same unit.

Control

***Configuration :**

- Unit of measurement: bar or mbar.
- Relay: R1 (activation of relay 1), R2 (activation of relay 2), R1-R2 (activation of relay), - (no activation of relay).
- LED: Red, Yellow, - (no LED).
- Affected source: S1, S2, S3, S4.

dimensions of the box allow it to be installed in line with most medical gas devices on the market, with easy access for installation, wiring, figuration, and maintenance.

The various parameters of each of the analog or logic inputs and their transmitters (see table below) can easily be fine-tuned according to your specifications by entering an access code according to the standards and regulations in force.

Background

Memory capacity	108 elements
Date display	dd/mm/yy
Page display	active/total
Display of stored events	Yes
Time display	hh :mm

Analog input

Type of network	One-press/ Two-press
Section(s) monitored (1)	1 to 4 (S1, S2, S3, S4) *
Gas name	Name + color
Unit of measurement	b or mb
Upper threshold alarm message	30 characters
Upper pressure threshold	- 1000 to 1000
Upper threshold alarm activation	Activated or not
Upper threshold audible and visual alarm	2 options (2)
Lower threshold alarm message	30 characters
Lower pressure threshold	0 to 1000 or 0 to -1000
Lower threshold alarm activation	Activated or not
Lower threshold audible and visual alarm	2 options (2)

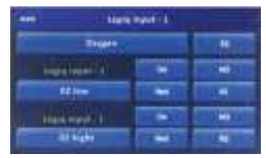

Analog sensor

Pressure corresponding to 20 mA	- 1000 to 1000
Pressure corresponding to 4 mA	- 1000 to 1000
Pressure correction (offset)	- 1000 to 1000
Sensor error alarm message	30 characters
Sensor error alarm activation	Activated or not
Sensor error audible and visual alarm indication	2 options (2)
Sensor error alarm indication delay	0 to 250 seconds

Logic input

Type of network	One press -> individual logic input Two press -> Logic inputs coupled (S2 ;S3)
Section(s) controlled (1)	S1, S2, S3, S4*
Gas name	30 characters
Digital alarm message	30 characters
Digital alarm activation	Activated or not
Digital audible and visual alarm indication	2 options (2)
Digital contact type	NC or NO

* S1 : Supply source
S2 : Primary network
S3: Secondary network
S4: Single supply

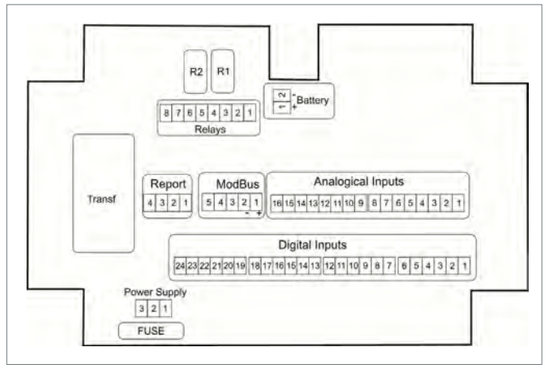

(1) In double pressure configuration only
(2) Emergency operation

INSTALLATION

The box can be connected either from the wall or any of the four sides of the box.

Maintenance

All the equipment is grouped in the front of the case and secured to the facade. The connectors are unpluggable, equipped with a polarizing device and identified according to the diagram below:

The saving and loading of the client configuration are achieved through the USB interface and via the 5 '' touch screen.

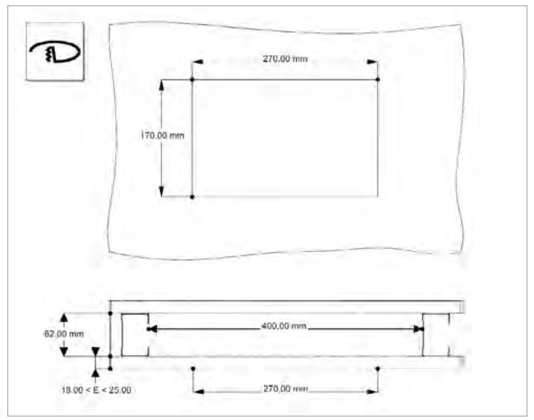

Signal report

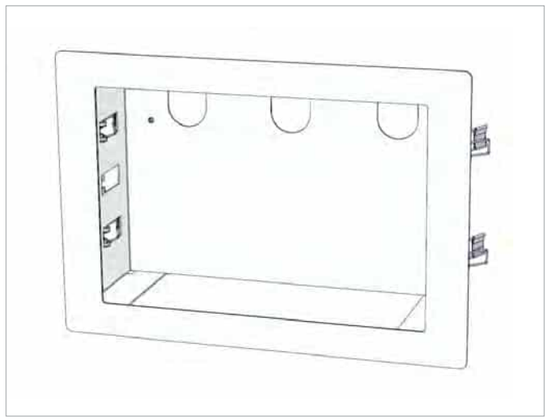

Communication via the RS 485 BUS dedicated to report offers all the possibilities of signal transfer to the report modules via two-pair cables from one report to another over a cable distance of up to 1000 meters*.

The OLED screen of the SEC MIR report displays all the information and alarms of the unit. The OLED screen module lets you view the same data as a mirror unit but at lower cost and with the advantage of a more compact unit.
The flush or surface mounting are easier by using MOSAIC 45 dimension.

The SECURIDYS offers as an option, a recessed box.

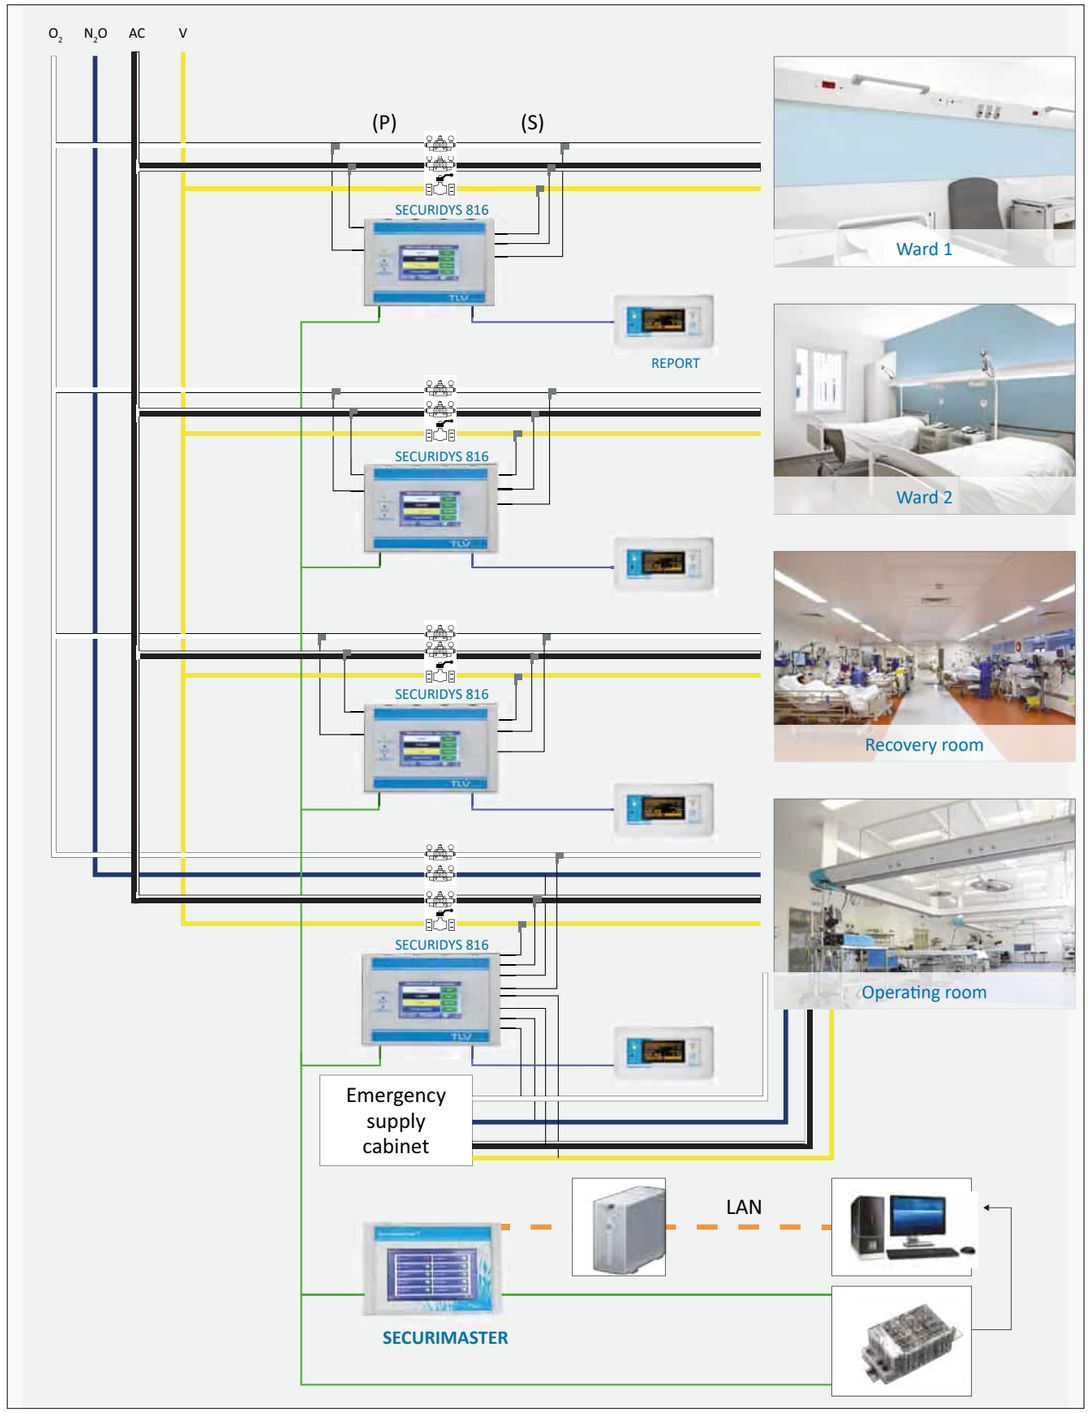

ENHANCED MONITORING OF YOUR MEDICAL GASES NETWORKS

The various solutions offered by the SECURIDYS product range allow easy transmission of signals and alarms in your medical gases networks.

RS 485 BUS transfer cable*
485 Modbus*RTU or TCP/IP
TCP/IP Ethernet cable

(P) Primary
(S) Secondary

SIGNAL TRANSMISSION

The real-time availability and storage of signals is essential, whether this concerns a maintenance standby signal or connection to a CTM or BMS software package.

The SECURIDYS range offers every possible technological opportunity to send, centralize, save, and analyze information obtained by monitoring your medical gas networks.

With the RS 485 RTU BUS or TCP/IP protocol, transfer all the data concerning the status of your gas network

Information is transferred from the units to the report modules by a different RS 485 BUS from the one dedicated to Centralized Technical Management or the Building Management System. The Securidys is able to manage two communication protocols: ModBus RTU and ModBus TCP / IP.
The ModBus RTU protocol of SECURIDYS units, with their built-in power supply, allows data to be transferred safely over a distance of 1000 meters via a Belden 9841 or equivalent cable.
The ModBus TCP / IP protocol uses the intranet network of the hospital for the transfer of information.

With SECURIMASTER, it is easy to centralize the data on your touch screen

When connected to the units via the RS 485 BUS, SECURIMASTER allows you to centralize the monitoring and alarm data from 30 SECURIDYS or five SECURIMASTER units.

The SECURIMASTER supervision module provides you with remote information via the Modbus RS485 TCP/IP or BACNET protocols.

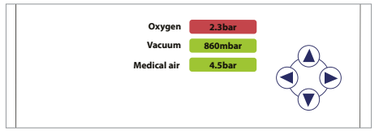

Data processing

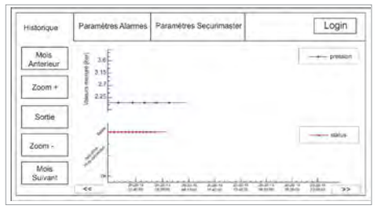

On the SECURIMASTER screen, you can monitor the status of each SECURIDYS alarm unit connected.

Select one of the icons to switch to a screen representing the alarm unit of the service concerned, with the gas pressure values.

Select one of the gases to view its data history.

TECHNICAL AND NORMATIVE SPECIFICATIONS

Monitoring and alarm system for compressed gas distribution and vacuum networks

SECURIDYS alarm units

Part No.	Model	Description
519368	SECURIDYS 816	8 analog inputs and 16 logic inputs with MODBUS interface

TLV offers a large range of biomedical accessories, examination lamps, tilting swivel arm for screen, monitor, keyboard, telescopic IV pole, rails, trays, drawers, nurse call...

BIOMEDICAL ACCESSORIES

LED

Care LED lamp with dimming on articulated arm with clamp

This lamp is really convenient for examinations and is suitable for resuscitation ward or patient rooms.

Length : 885 mm
Light output 30000 Lux / 0,5 m
Field of illumination 300 mm / 0,5 m
Color temperature 4400 K
CRI > 93

For horizontal rail, ref : 815652

For vertical tube or rail, ref : 815653

LED

Care LED lamp on articuled arm

This lamp can be used in examination rooms or ICU. It provides reliable and ideal lighting for medical examinations.

1 color temperature, with clamp

Length : 940 mm
Light output 50000 Lux / 0,5 m
Field of illumination 180 mm
Color temperature 4 400 K
CRI > 93

For horizontal rail, ref : 815654

For vertical tube or rail, ref : 815655

3 color temperatures, with clamp, 5 gradation level

Light output 50000 Lux / 0,5 m
Field of illumination 180 mm
Color temperature 3 300 K / 3 800 K / 4 400 K
CRI > 93

For horizontal rail, ref : 815656

For vertical tube or rail, ref : 815657

LED

LED lamp on flexible arm

This lamp is suitable for daily medical examinations.

Length : 1000 mm
Light output 50000 Lux / 0,5 m
Field of illumination 180 mm
Color temperature 4 400 K
CRI > 93

For horizontal rail, ref : 815714

For vertical tube or rail, ref : 815715

LED

LED lamp on articulated arm with clamp

Length : 991 mm
Light output 50000 Lux / 0,5 m
Field of illumination 100 mm
Color temperature 4 300 K

For horizontal rail, ref : 815662

For vertical tube or rail, ref : 815663

LED

LED minor spot and examination lamp with double joint rigid arm (clamp included)

This care lamp is ideal for emergencies, neonatalogy or in addition in operating rooms for small or ambulatory surgeries. It can be screwed onto the ceiling anchoring of the TECH-CARE pendant.

Length : 1750 mm (+ tige verticale min 700 - max 1200)
Light output 80000 Lux / 1m
Field of illumination 180 mm
Color temperature 4 500 K
CRI > 95

For ceiling mounting, ref : 815706

For wall mounting, ref : 815707

LED

Wall-mounted LED lamp

Length : 1850 mm
Light output > 40000 Lux / 1 m
Field of illumination < 240 mm
Color temperature 4 500 K

Ref : 519143

EXAMINATION LAMPS

LED

LED lamp on articulated arm, 2 color temperatures with clamp, 4 dimming level

This lamp is perfect for sensitive areas like neonatology or ICU/ Resuscitation.

Length : 1080 mm
Light output 60000 Lux / 0,5 m
Field of illumination 210 mm
Color temperature 3 500 K / 4 500 K
CRI > 93

For horizontal rail, ref : 815658

For vertical tube or rail, ref : 815659

CARE AND READING LAMPS

LED

Option without switch

Care and reading LED lamp on flexible arm

It is particularly recommended for reading in the patient rooms of hospitals or retirement homes.

Length : 800 mm
Light output 1100 Lux / 0,5 m
Field of illumination 600 mm
Color temperature 3 000 K
CRI > 80

For horizontal rail, ref : 815708

For vertical tube or rail, ref : 815709

As option:
This lamp is available without switch. In this case the control will be done directly from the nurse call pear.

For horizontal rail, ref : 815710

For vertical tube or rail, ref : 815711

LED

Care and reading LED lamp on flexible arm

This lamp is mainly used for reading in retirement homes. The handle integrates a luminous ON/OFF switch. It enables easy use and positionning.

Length : 820 mm
Light output 1000 Lux / 0,5 m
Field of illumination 450 mm
Color temperature 3 000 K
CRI > 95

For horizontal rail, ref : 815712

For vertical tube or rail, ref : 815713

TILTING SWIVEL ARM FOR SCREEN / MONITOR

Monitor stand

Swivel arm, length 300 mm, for VESA quick-fit panel (18 kg max.)

For horizontal rail, ref : 511508

For wall vertical rail, ref : 511510

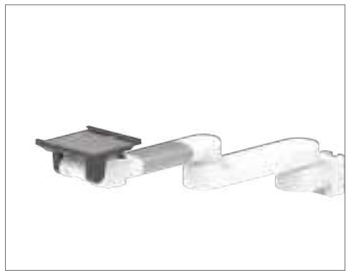

For vertical Ø38 tube, ref : 519126

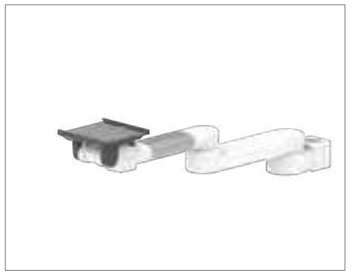

Swivel arm, length 300+300 mm, for VESA quick-fit panel (18 kg max.)

For horizontal rail, ref : 511509

For vertical rail, ref : 511511

For vertical Ø38 tube, ref : 511524

VESA 75 /100 mm monitor stand on clamp for tube (Ø 23-40 mm)

Ref : 815489

VESA quick adapter panel

Ref : 519131

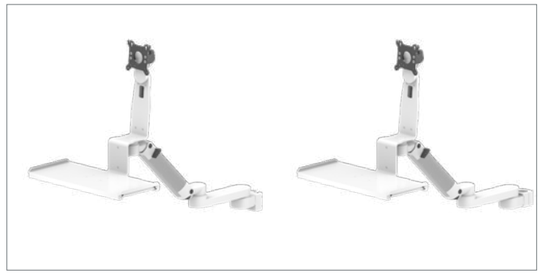

Height adjustable arm 450 mm offset 438 mm vertical travel for VESA monitor (16 kg max)

For vertical rail, ref : 511512
For vertical Ø38 tube, ref : 511525

Height adjustable arm 450 mm offset, 438 mm vertical travel with 230 mm extension for VESA monitor (16 kg max)

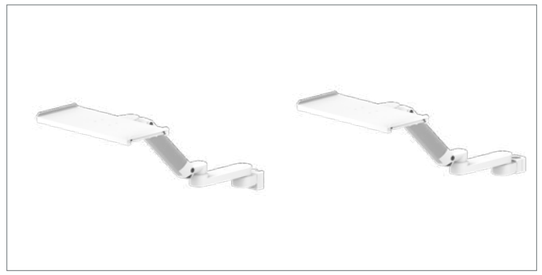

For vertical rail, ref : 511513
For vertical Ø38 tube, ref : 511526

Height-adjustable monitor/keyboard stand, 450 mm offset, 438 mm vertical travel with 230 mm extension (16 kg max)

For vertical rail, ref : 511514

For vertical Ø38 tube, ref : 511530

Height adjustable arm, 450 mm offset, 438 mm vertical travel with 230 mm extension (5 kg max on the tray)

For vertical rail, ref : 511694

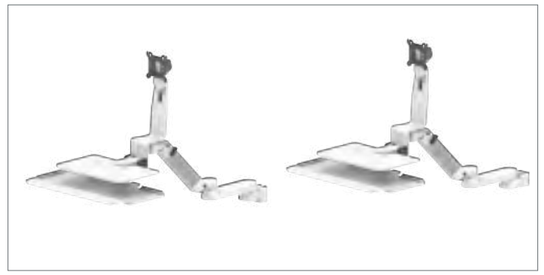

For vertical Ø38 tube, ref : 511695

Monitor/keyboard stand with height-adjustable work surface, 450 mm offset, 438 mm vertical travel (14 kg max)*

For vertical rail, ref : 511580

For vertical Ø38 tube, ref : 511577

Monitor/keyboard stand with height-adjustable work surface, 450 mm offset, 438 mm vertical travel with 230 mm extension (14 kg max)*

For vertical rail, ref : 511578

For vertical Ø38 tube, ref : 511579

* For other loads, please consult us.

Height adjustable arm, 524 mm horizontal extension, vertical travel 330 mm (max 11,3 kg)

Load max : 9 kg

For vertical rail, ref : 815349

For vertical Ø38 tube, ref : 815339

Height adjustable arm, 524 mm horizontal extension, vertical travel 330 mm

For vertical rail, ref : 815350

For vertical Ø38 tube, ref : 815340

Height adjustable screen and keyboard stand with work surface 432 mm horizontal extension, vertical travel 508 mm (max 14,5 kg)

For vertical Ø38 tube, ref : 815687

Universal cable conduit for 25x10 rail or Ø38 tube (batch of 4)

Mounting interface for mono FLUIDYS T with 2 lateral rails - Ref : 815685
Mounting interface for duo FLUIDYS T with 2 lateral rails - Ref : 815686

Electrical equipment

TLV products are cut by water jet, providing a precise, tailor-made finish so that sockets of any shape can be built into them. Electrical devices are flush-mounted, for easy cleaning and disinfection of products.

Medical gas equipment

TLV has developed casings for gas outlets, to enhance the appearance of its products. For quick and easy access to equipment, boxes, columns, and beams of our OT/ICU Resuscitation range do not include casings.

Medissima

Fluidys / Simple Care

Mediva

The many advantages of LED technology

- Production of light free from ultraviolet and infrared rays, hence no thermal radiation in the direction of the objects being illuminated
- Maximisation of the direction of the lighting
- Improved optical performance of the luminaires (high Efficiency)
- Excellent sustainability of the luminous flux over time (80% at 50,000 hours)
- Long service life that can be as long as 60,000 hours, providing a significant reduction in maintenance costs
- Reduction in energy consumption
- Ease of control for creating dynamic lighting
- Instantaneous illumination
- Comfortable lighting
- Ease of recycling (absence of mercury)
- Also enables new forms of luminaire to be created

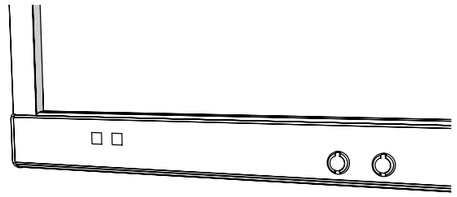

Luminous flux and Efficiency

Efficiency measured in watt (lm/W), is the quantity of light produced by one source in relation to the electrical power it consumes. The global efficiency of the luminaire reflects a performance : it depends on the source, the optics and the driver.

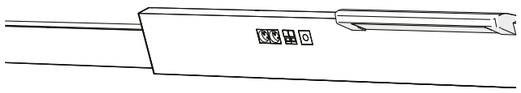

The luminous flow is the amount of light from a source (LED chip, LED module or luminaire). Today, the Efficiency of LED luminaire is 80% higher than a fluorescent luminaire.

The ducts vary depending on the product chosen and the configuration wanted.

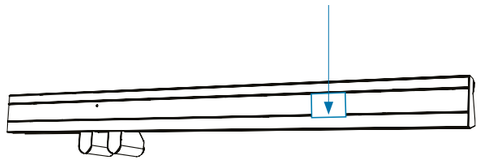

Supply from the ceiling (via a distribution duct)

Supply from the side (via a distribution duct)

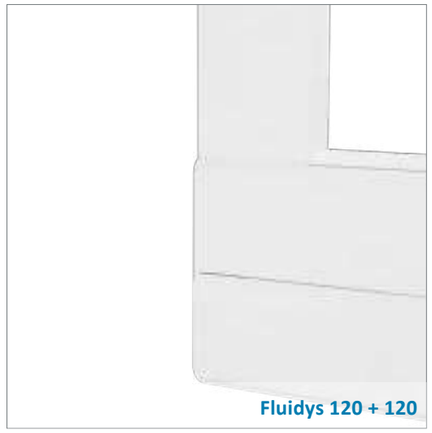

Supply from behind by a cut-out in the bed head unit

THE EFFECT OF DYNAMIC LIGHTING

TLV products equipped with Dynamic Lighting combine two innovative technologies. By equipping a system with LED sources, energy efficiency can be improved and therefore the overall consumption of the system can be reduced, whilst the effects of natural lighting from sunrise to sunset are simulated by artificial intelligence.

This means that the lighting automatically adjusts its colour temperature and its brightness throughout the day and without requiring any intervention.

The intelligence of the TLV Dynamic Lighting system resides in its ability to satisfy the lighting needs of health-care facilities and its ability to simulate the biological effects of natural light, which contributes to improving the day-to-day comfort of residents and medical personnel alike.

Dynamic Lighting creates a natural and stimulating light environment inside buildings. It boosts human feelings of well-being. It can also be adapted to the needs of its users. In a hospital setting, Dynamic Lighting can be a means to improve the comfort of patients and care personnel.

Advantages and benefits for patients and care teams

- Improves the patient environment
- More pleasant wake cycle
- Stimulating light during the daytime
- A feeling of well-being thanks to light that is closer to natural light
- Helps resynchronise the circadian rhythm
- Positive effect on mood and feelings of well-being
- Promotes concentration in care teams

SKYDECO	•

APPLICATIONS IN A HOSPITAL ENVIRONMENT

Dynamic Lighting can be used in normal care rooms, OT/ICU Resuscitation areas, and passageways.

Normal care rooms

One of the essential functions of the system is to use light to restore a temporal reference to people whose circadian rhythm has been upset.

FLUIDYS bed head unit

OT/ICU resuscitation areas and passageways in health-care facilities

Surgery times in the operating theatre, lack of exposure to natural light, examination cubicles where patient privacy must be protected: all of these situations require medical personnel to work in artificial lighting, cut off from any temporal reference. Dynamic Lighting can compensate for this.

ILUS sealed ceiling lights

Retirement homes and nursing homes

Chronobiological changes in the elderly can result in a phase shift in the sleepwake cycle, leading to an earlier bedtime and earlier rising compared to socio-cultural norms.

To remedy this problem, the Dynamic Lighting option synchronized to the (24-hour) circadian cycle allows residents to resynchronize their biological rhythm and avoid a significant offset of their day/night cycles. This makes the sleep-wake cycles more pleasant, because the lighting adapts gradually.

LYSA non-medical wall lighting unit

Alzheimer Units

Alzheimer patients can be subject to changes in their circadian rhythm, and sometimes their sleepwake cycle becomes disrupted. Dynamic Lighting contributes to resynchronising the internal biological clock.

HI-BEAM bed head unit

OPERATION

Thanks to its embedded electronics, the TLV Dynamic Lighting system is just as easy to use as a standard product.

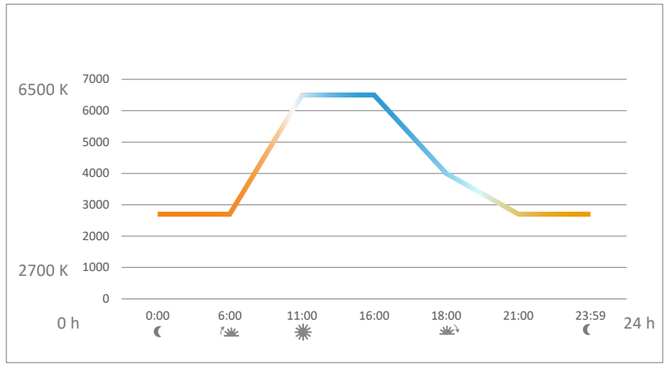

When it is switched on, the colour temperature is automatically adjusted according to the location, the time, and the position of the sun. The colour temperature is then adjusted throughout the day.

In parallel, the artificial lighting can be adjusted (optionally) according to the natural light available. This saves energy.

For areas without natural light, it is possible to vary the brightness according to the time of day. In this operating mode, the behaviour of the product tends to reproduce a circadian cycle, for a gentler awakening phase and a more pleasant end to the day.

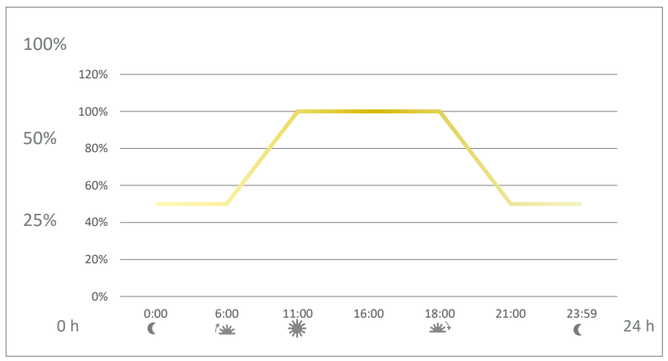

The caring lighting control can be used at any time to switch the Dynamic Lighting to 100% intensity with a neutral tone. This care mode, combined with the reading lighting, provides high-performance lighting in accordance with AFE* recommendations.

Variation in colour temperature and intensity over a 24-hour cycle.

The curve adjusts automatically according to location and season.

- The brightness control can be synchronised:
  - To the colour temperature variation curve.
  - With an optional brightness sensor, for the light intensity to adapt automatically to the natural light available.

The curve adjusts spontaneously according to the location and seasons or the automatic light-up and lights-out time, depending on the requirements of the department. This means that patients can be woken up with a warm tone just before breakfast.

* AFE : French Lighting Association

LIGHT: AN ESSENTIAL ELEMENT OF OUR DAILY LIVES

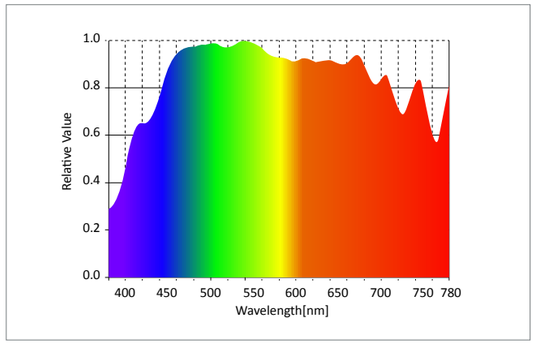

TLV's Dynamic Lighting technology provides health-care facilities with a quality of light much closer to that of natural light—an essential element for our biological rhythms.

The effects of natural light in our daily lives are partly thanks to the spectrum that makes up this light. Until now, the use of fluorescent light sources did not allow us to properly reproduce the spectrum of daylight, whose wavelengths are continuous and fall between 380 and 780 nm.

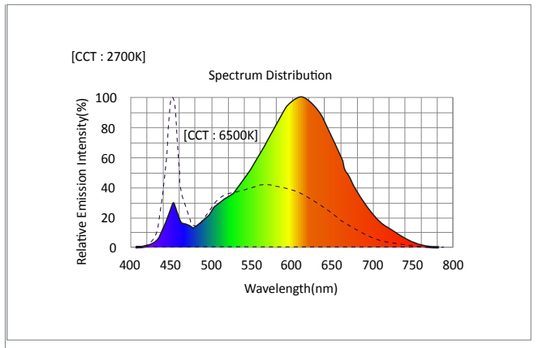

Thanks to the use of TLV technology, which combines the use of high-performance LEDs with embedded artificial intelligence, the light emitted is far more similar to the spectrum of sunlight. The characteristic rays of fluorescent sources are gone, and are replaced by a more complete, more natural, and therefore more pleasant spectrum.

To do this, TLV uses two light spectra: a 2700K spectrum and a 6500K spectrum. These are mixed appropriately according to the time of day, to obtain the most natural lighting possible. The warm light spectrum provides significant red content, like the light at sunrise and sunset. The cold light spectrum provides significant blue content, which is invigorating.

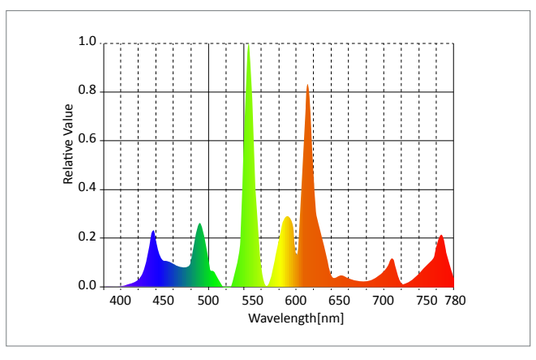

Natural light

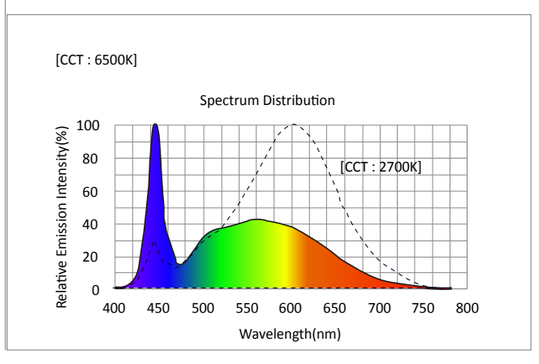

TLV artificial tunable white light

Fluorescent artificial light

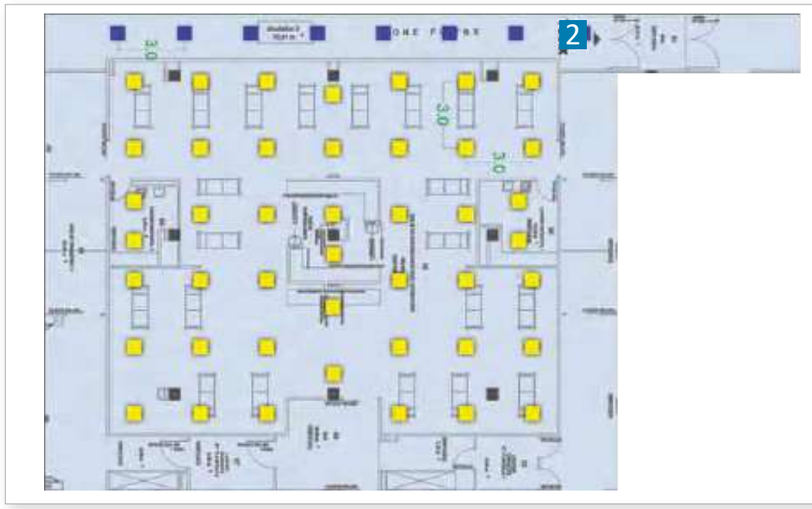

CIRCULATION LIGHTING

TRATO, TLV's sister company, specialized in lighting, offers many products for circulation spaces, offices and waiting rooms. The different LED solutions provide efficient and effective lighting contributing to the comfort of patients and caregivers. For more product information, visit www.trato.fr.
